## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 6-10, 19-24, 34-37, 49-54, 59-61, 71-75, 84-87, and 97-100, drawn to a semiconductor device formed using a photo-definable layer in a positive mask scheme, classified in class 257, subclass 428.
- II. Claims 55-58, 62-70, 76-83, and 88-96, drawn to a process for using a photo-definable layer in a negative mask scheme to manufacture a semiconductor device, classified in class 438, subclass 788.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product as claimed does not give patentable weight as it is a "product by process" claim, as such, the process features of group II (claims 55-58, 62-70, 76-83, and 88-96) particularly recited "exposed selected portions of said photo-definable layer to electro-magnetic radiation in a negative pattern scheme to convert said selected portions to an insulative material" are not needed for the group I (claims 6-10, 19-24, 34-37, 49-54, 59-61, 71-75, 84-87, and 97-100). Initially, with respect to claims a "product by process" claim is directed to the product per se, no matter how actually made, In re Hirao, 190 USPQ 15. See also In re Brown, 173 USPQ 685; In re Luck, 177

Art Unit: 2823

USPQ 523; In re Fessmann, 180 USPQ 324; In re Avery, 186 USPQ 161; In re Wertheim, 191 USPQ 90 (209 USPQ 554, does not deal with this issue); In re Fitzgerald 205 USPQ 594, 596 (CCPA); In re Marosi et al, 218 USPQ 289 (CAFC); and In re Thorpe et al, 227 USPQ 964 (CAFC, 1985) all of which make it clear that it is the patentability of the final product per se which must be determined in a "**product by process**" claim, and not the patentability of the process, and that, as here, an old or obvious product produced by a new method is not patentable as a product, whether claimed in "product by process" claims or not. Note that applicant has the burden of proof in such cases, as the above case law makes clear.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
